

5 Reasons You Should Unify Your IT Stack

Discover the real-world benefits of IT unification for your business.

01

Lower TCO

Lower your total cost of ownership environment-wide by centralizing the core functionality you need to effectively run your department and support your business.

02

Improved Admin UX

A unified stack builds trust in IT and makes administration easier and more efficient, leading to greater productivity and higher satisfaction in IT.

03

Security & Visibility

Avoid shadow IT by delivering preapproved apps that you're confident in and have validated through supply chain assessments.

04

Modern Authentication

Modern authentication, such as conditional access and passwordless authentication, prevents unauthorized and unmanaged access to IT resources (with greater control over the authentication chain.)

05

Visibility Streamlines Compliance

Maintain a full account of your assets to streamline audits and compliance—and avoid the rush to assemble information from many places.

JumpCloud® helps IT teams Make Work Happen® by centralizing management of user identities and devices, enabling small and medium-sized enterprises to adopt Zero Trust security models. JumpCloud has a global user base of more than 200,000 organizations, with more than 5,000 paying customers including Cars.com, GoFundMe, Grab, ClassPass, Uplight, Beyond Finance, and Foursquare. JumpCloud has raised over \$400M from world-class investors including Sapphire Ventures, General Atlantic, Sands Capital, Atlassian, and CrowdStrike.
