

# Zero-Touch Enrollment in the JumpCloud Directory Platform

## Simplify your workflows and tech stack with directory-integrated Zero- Touch Enrollment for Mac device onboarding

Zero-Touch Enrollment enables the most streamlined onboarding experience while saving time and steps for Mac administrators.

The JumpCloud Directory Platform integrates device, identity, and access management capabilities to create an identity-first approach to securely administering corporate devices. Zero-Touch Enrollment unifies user identity with device at the first login to provide secure, frictionless access to IT resources.

## When you use directory-integrated Apple MDM for touchless enrollment, you can:

- Make onboarding faster and easier for both admins and employees in remote, hybrid, and office work environments
- Use your all-in-one cloud directory to provide everything you need for secure remote onboarding — no need to integrate with a separate MDM vendor
- Maximize productivity in your easy-to-use JumpCloud Admin Console to set up the user identity and group associations in just a few mouse clicks
