# JumpCloud Asset Management

JumpCloud Asset Management enables IT admins and managed service providers (MSPs) to effortlessly track, manage, and report on organizational assets from laptops and desktops to peripherals–all within a single, unified platform.

Full Visibility and Control Over Every Asset

Automate and Centralize Asset Inventory

Automatically sync JumpCloud-managed devices and view complete asset records including hardware specifications, purchase details, and status. Keep your inventory accurate and always up to date without any manual effort. Easily import unmanaged assets via CSV or API.

Faster, Efficient IT Operations

Leverage asset tracking and historical change data to quickly resolve issues, enforce accountability, and reduce troubleshooting time. JumpCloud Asset Management works seamlessly with device and access management, allowing IT to handle everything in one place without juggling multiple tools.

Optimize IT Budgeting

Track asset costs, deprecation, warranty status, and operational expenses, organizations to gain a clear view of all IT expenditures and make more informed decisions. Prevent over-purchasing, optimize spend, and ensure cost efficiency across asset lifecycle.
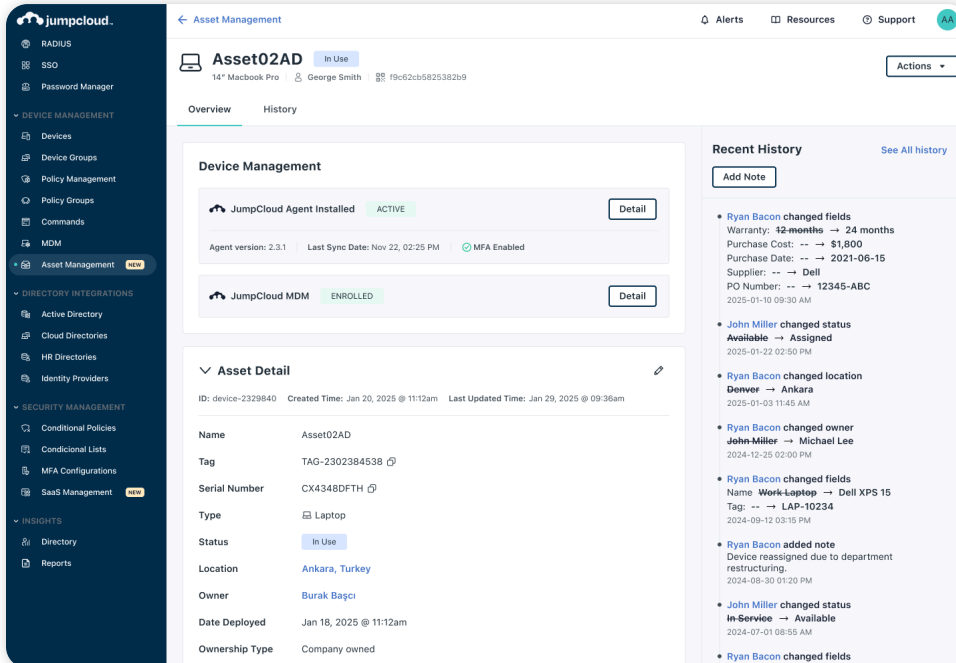

Stay Compliant

Generate CSV reports effortlessly. Export your entire asset inventory - complete with locations, custom fields, and status - for use in compliance reviews, internal reporting, or asset audits. Maintain a historical trail of changes per asset to support audits and accurate tracking over time.
