

JumpCloud Windows Mobile Device Management (MDM)

JumpCloud Windows MDM allows IT admins and managed service providers (MSPs) to easily onboard and manage Windows devices for their end users. This unified windows management supports modern endpoints that includes ARM devices, and servers, while leveraging the industry-trusted and standardized Windows MDM protocol.

This seamless integration optimizes and future proofs IT management and security workflows, while avoiding additional costs. In addition, the unique capabilities of the JumpCloud agent enhance Windows device management, providing a comprehensive solution that combines the best of both worlds for IT admins and MSPs.

Windows MDM lives in the MDM section in the JumpCloud Admin Console.

Easy Device Enrollment While Meeting Security Protocols

Increased IT Productivity

It is not always easy for IT admins to seamlessly enroll Windows devices and manage both user-led and IT-led device onboarding scenarios. In addition, IT often needs to integrate and manage multiple point solutions, adding to their already heavy workload. With JumpCloud Windows MDM, IT can easily manage the entire Windows fleet, saving time and eliminating tedious manual processes.

Reduction of Security Risks

Enforcing tamper proof security policies and configurations in order to comply with organization compliance requirements can be difficult. JumpCloud limits or eliminates the potential security risks by making sure that JumpCloud Agent cannot be easily tampered with by end users.

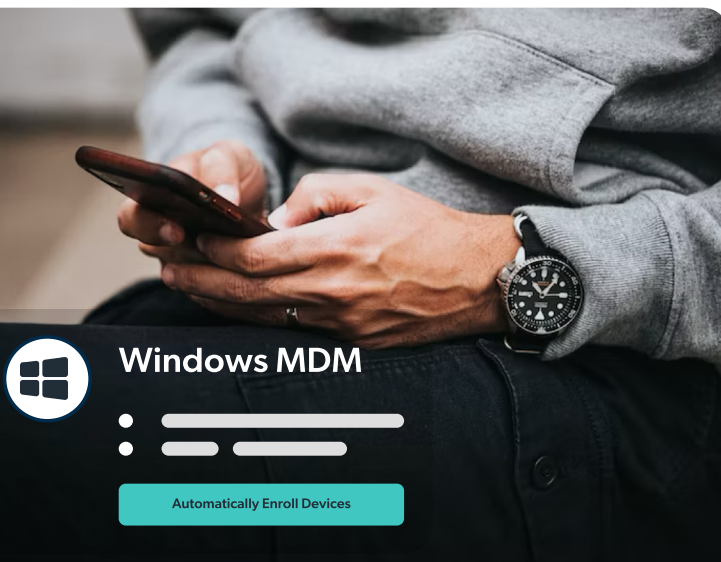

Unified Endpoint Management

Organizations usually need to purchase and integrate multiple vendor solutions to support the full range of devices and user management responsibilities. IT can now support Windows, macOS, Linux, Android and iOS from one console. It provides better onboarding, management, and control of end users' devices and improves the admin overall experience with MDM protocol support for Apple, Google, and now Microsoft.

Windows MDM is included in the [JumpCloud Platform, Platform Plus, or Device Management pricing package](#) at no additional cost.

Need Help Getting Started?

JumpCloud's Professional Services Team is here to support you along the way. Whether you need implementation assistance or hands-on engineering support, there's a service package for you. [Learn more and find the right service level for your business today.](#)

Key Features

- **Simplified Onboarding:**
Effortlessly onboard your Windows devices using Provisioning Packages. Streamline user adoption with self-enrollment through the user portal.
- **Unified Identity & Device Security:**
Enhance security by tightly integrating user identities with device management, ensuring only compliant Windows devices can access company resources.
- **Streamlined Policy Management:**
Easily apply and enforce policies consistently across your Windows fleet, regardless of device configuration.
- **Agent tamper protection:**
Allow the enforcement of security policies and corporate compliances to prevent data leakage and control user activities.
- **Seamless Software Management:**
Deploy and patch applications, and OS on time. Maximize device performance and optimize user experience.
- **Comprehensive Device Insights:**
Gain in-depth visibility into all events occurring on your Windows devices. Achieve regulatory compliance effortlessly with robust reporting and audit trails.
- **User-Centric Policy Management:**
Apply policies and configurations based on the signed-in user's identity, not just the device, so security and settings follow the person across shared or multi-user Windows machines.

JumpCloud® helps IT teams **Make Work Happen®** by centralizing management of user identities and devices, enabling small and medium-sized enterprises to adopt Zero Trust security models. JumpCloud has a global user base of more than 200,000 organizations, with more than 5,000 paying customers including Cars.com, GoFundMe, Grab, ClassPass, Uplight, Beyond Finance, and Foursquare. JumpCloud has raised over \$400M from world-class investors including Sapphire Ventures, General Atlantic, Sands Capital, Atlassian, and CrowdStrike.
