

| Features                               | JumpCloud | Iru<br><small>(formerly Kandji)</small> |
|----------------------------------------|-----------|-----------------------------------------|
| Unified Endpoint Management            |           |                                         |
| Multi-OS Device Management             | Yes       | Yes                                     |
| Device Policies (GPO like)             | Yes       | Yes                                     |
| Device MFA                             | Yes       | Yes                                     |
| Zero Touch Enrollment                  | Yes       | Yes                                     |
| Server Management                      | Yes       | No                                      |
| Remote Monitoring & Management         | Yes       | Yes                                     |
| Real-time Monitoring & Alerting        | Yes       | Yes                                     |
| Comprehensive Remote Access            | Yes       | Yes                                     |
| Unattended Remote Control              | Yes       | No                                      |
| IT Automation & Custom Workflows       | Yes       | Yes                                     |
| Patch Management                       | Yes       | Yes                                     |
| Scripting (Bash & Powershell)          | Yes       | Yes                                     |
| Cloud Infrastructure Server Management | Yes       | No                                      |
| Software Deployment                    | Yes       | Yes                                     |
| Asset Management                       | Yes       | Yes                                     |
| User-centric Policies                  | Yes       | Yes                                     |
| Self-service App Catalog               | Yes       | Yes                                     |
| Identity & Access Management           |           |                                         |
| Cloud Directory Service                | Yes       | No                                      |
| Cloud LDAP                             | Yes       | No                                      |
| Cloud Radius                           | Yes       | No                                      |
| Single Sign-On                         | Yes       | Yes                                     |
| Multi-factor Authentication            | Yes       | Yes                                     |
| Passwordless Authentication            | Yes       | Yes                                     |
| User Lifecycle Management              | Yes       | Yes                                     |
| Conditional Access                     | Yes       | Yes                                     |
| Password Manager                       | Yes       | No                                      |
| Access Requests                        | Yes       | Yes                                     |
| Agentic IAM                            | Yes       | Yes                                     |
| Privileged Access Management           |           |                                         |
| Credential Vaulting & Rotation         | Yes       | No                                      |
| Privileged Session Management          | Yes       | No                                      |
| Privileged Elevation                   | Yes       | No                                      |
| Secrets Management                     | Yes       | No                                      |
| Just-In-Time (JIT) PAM                 | Yes       | No                                      |
| Least Privilege Enforcement            | Yes       | Yes                                     |
| SSH Key Management                     | Yes       | No                                      |
| Remote Browser Isolation (RBI)         | Yes       | No                                      |
| SaaS Management                        |           |                                         |
| SaaS Discovery                         | Yes       | No                                      |
| SaaS License Management                | Yes       | No                                      |
| SaaS Access Control                    | Yes       | Yes                                     |
| SaaS AI Discovery                      | Yes       | No                                      |
