

JumpCloud Access Certification

JumpCloud Access Certification extends identity governance beyond granting access. Run recurring campaigns, assign reviews, automate remediation, and preserve evidence in the same unified platform for identity, access, devices, and agents. Make recurring access reviews and audit preparation part of everyday IT as your business changes.

**Govern every identity.
Certify the right access.**

See What Needs Review.

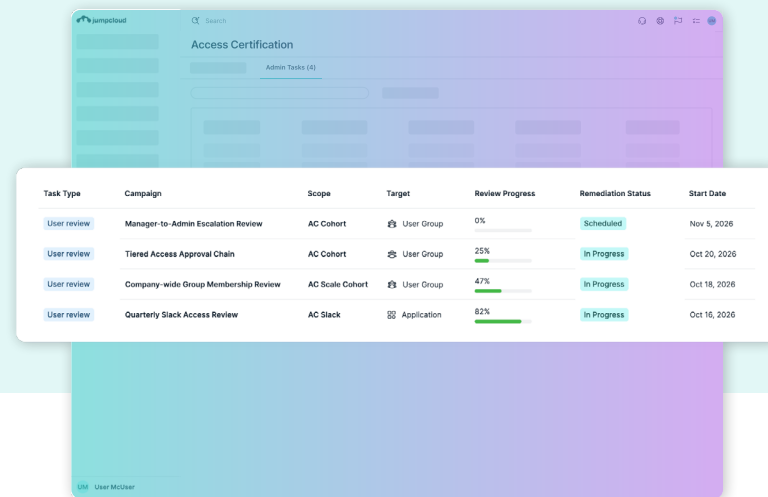

Create one-time or recurring campaigns to review SSO application access or user group membership. Track scheduled, active, and closed campaigns in one place to see what is under review, who is responsible, and what still needs action.

Put Decisions With the Right People.

Configure reviews for administrators, users' managers, resource owners, or user groups, with optional multi-step requirements. Let non-admin reviewers use the User Portal to make informed Keep, Revoke, or Reassign decisions while IT retains oversight.

Close the Loop. Document the Outcome.

Apply configured remediation after a final Revoke decision or an unanswered review and track execution. Preserve decisions, justifications, access snapshots, and outcomes in read-only records and tamper-evident reports documenting your organization's attestations.

Task Type	Campaign	Scope	Target	Review Progress	Remediation Status	Start Date
User review	Manager-to-Admin Escalation Review	AC Cohort	User Group	0%	Scheduled	Nov 5, 2026
User review	Tiered Access Approval Chain	AC Cohort	User Group	25%	In Progress	Oct 20, 2026
User review	Company-wide Group Membership Review	AC Scale Cohort	User Group	47%	In Progress	Oct 18, 2026
User review	Quarterly Slack Access Review	AC Slack	Application	82%	In Progress	Oct 16, 2026

Strategic Use Cases

Compliance Reviews

Schedule recurring access reviews and document your organization's attestations to help support access review aspects of SOC 2, ISO 27001, SOX, and similar compliance programs.

Internal Audits

Respond to security and audit requests with scoped reviews of application access or group membership.

Application Budget Reviews

Revalidate application access before budgeting and renewal decisions, then remove permissions that no longer serve a business need.

Offboarding and Organizational Changes

Review access after departures or role changes. Apply configured remediation and use Access Certification events to trigger additional follow-up actions through JumpCloud Workflows.

Key Features

- **Campaign Lifecycle:**
Run one-time or recurring certifications for SSO application access or user group membership, with Scheduled, Active, and Closed views.
- **Users:**
Let non-admin reviewers complete assigned certifications in the User Portal, using identity, application, or group context and bulk Keep, Revoke, or Reassign actions.
- **Remediation Configuration:**
Configure Revoke and no-response actions, set immediate or post-review timing, and track system execution through completion.
- **Multi-Step Reviewer Chains:**
Configure reviews for administrators, users' managers, resource owners, or user groups, with optional multi-step requirements, justification, reassignment, and administrator override.
- **Notification Channels and Admin Queue:**
Send email notifications and reminders, and consolidate pending administrator review and remediation tasks in the Admin Queue.
- **Audit Reports:**
Download closed-campaign PDFs with optional admin sign-off documenting your organization's attestations. Export and retain reports and event logs to support audits. Directory Insights retains events for 90 days.

Need Help Getting Started?

JumpCloud's Professional Services Team is here to support you along the way. Whether you need implementation assistance or hands-on engineering support, there's a service package for you.
